

# UNDERSTANDING YOUR CHICKENS' POOP

## UNDERSTANDING YOUR CHICKEN'S DIGESTIVE SYSTEM

## NORMAL CHICKEN POOP VARIATIONS

### Regular Chicken Poop

Most healthy chicken poop is brownish, greenish, and has the cap of urates

### Cecal Poop

"pudding-like" poo without the white urate cap

### Broody Hen Poop

A large build-up of chicken poop held for so long and smells bad

## ABNORMAL CHICKEN POOP VARIATIONS

### Wormy Chicken Poop

Worms in your chickens' dropping, or even in their eggs or shells

### Foamy Chicken Poop

Foamy, yellow, poop, she could have worms or a bacterial infection in her digestive tract

### Blood in Chicken Poop

It indicates that your hen has coccidiosis

### Watery Droppings

It can appear thin and watery. She could have worms or an infection
